

Dick Bedlington Farms

AMAROSA

Amarosa features vibrant red skin and flesh with small tubers and shallow eyes. It is well suited for the fresh and gourmet market, offering a unique flavor and retaining its striking red color after cooking. This variety has strong resistance to scab and tuber blight, though it is susceptible to PVY. Amarosa also offers above-average storage performance compared to other fingerling varieties.

PLANT

Maturity	Late
Growth habit	Semi-upright
Color of flower	Pink
Number of tubers	Mid to High
Dormancy	High

TUBER CHARACTERISTICS

Tuber shape	Fingerling
Flesh color	
Eye depth	Shallow
Skin color	Red

RESISTANCES

Leaf blight	Medium
Tuber blight	High
Rhizoctonia	
Black leg	
Common Scab	High
Internal rust spot	
Second growth	
Silver scurf	Medium
Bruising	Very high
PVY	Low

YIELD & QUALITY

Market outlet	Gourmet, Fresh
Yield	High
Share oversize	Low
Share undersize	Medium
