

Dick Bedlington Farms

SATINA

Satina features attractive yellow skin and yellow flesh, producing medium to large tubers with a very high yield per plant. It offers outstanding tolerance to common scab, tuber blight, mechanical damage, bruising, and second growth. Satina stores exceptionally well long term and is an excellent choice for the fresh market.

PLANT

Maturity	Medium early
Plant type	intermediate
Growth habit	Upright
Color of flower	White
Number of tubers	High
Dormancy	High

TUBER CHARACTERISTICS

Tuber shape	Round oval
Flesh color	Yellow
Eye depth	Shallow
Skin color	Yellow

RESISTANCES

Leaf blight	High
Tuber blight	High
Rhizoctonia	Medium
Black leg	Medium
Common Scab	Very High
Internal rust spot	Very high
Second growth	High
Silver scurf	Medium
Bruising	High
PVY	Medium

YIELD & QUALITY

Market outlet	Fresh & Pre pack
Yield	High
Share oversize	High
Share undersize	Low
